DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-4 are rejected under 35 U.S.C. 102(a) as being anticipated by either Witherspoon et al or Gabel et al. Witherspoon et al col. 11, lines 50-60 and Gabel et al col.5, lines 45-55 disclose high velocity spray of iron (1/2 binder and 1/2 magnetic material). The permanent moment would be inherent. The iron (which is all the claim defines since no substrate is defined) would be an electric machine if the same is true of applicants' kinetically sprayed iron.

Claims 1-4 and 7-9 are rejected under 35 U.S.C. 102(a) as being anticipated by Sickafus. This reference discloses micro motors and coils having permanent magnets. It is the examiner's opinion that applicants' claims are anticipated by the motors and coils of the reference since process limitations in these article claims are immaterial from a patentable viewpoint.

Claim Rejections - 35 USC § 103

Claims 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over witherspoon et al or Gabel et al for the same reasons as urged in the above paragraph. The limitations of these dependent claims are conventional and do not render these claims unobvious. See Sickafus for micro motors and coils.

Claim Rejections - 35 USC § 112

Claims 5,6 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no antecedent support for "component" in claim 5. There is no antecedent support for "carrier" in claim 6. There is no antecedent support for "second component", "first component" and "the coil" in claim 10.
